Features

- › Locking force 600 N
- › Two screws M5x16 (one as safety screw) included

Actuator

The anchor plate for the CEM actuator has spring mountings and can be tilted to an angle of +/-4°.

Therefore, when a misadjusted safety door is closed, the CEM actuator automatically adjusts itself to the surface of the solenoid. Subsequent adjustment of the safety door is no longer necessary. Even with a center offset of 5 mm (anchor plate in relation to solenoid) the full locking force is achieved.

Mechanical values and environment

Material	Actuator installed	Plastic (PBT)
	Anchor plate	Steel, nickel-plated
