#### notice

On hinged guards, minimum actuating radius at  $90^\circ$  to the plane of the actuator 140 mm

minimum actuating radius on hinged guards in line with the plane of the actuator 200 mm

#### The actuator is not available separately.

The axis of the hinge should be 10 mm above the top edge of the safety switch and in the same plane Manual release

• For manual release using M5 triangular key, available as accessory

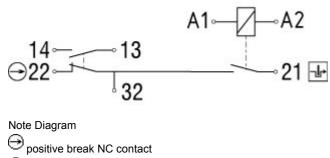

This type termination (IDC) method enables simple connetion of flexible conductors without the need for the use of conductor ferrules
