

KL1352 | 2-channel digital input terminal 24 V DC for NAMUR sensors

The digital input terminal KL1352 analyses the input signal from NAMUR sensors in accordance with EN 50277 (previously DIN 19234). One bit indicates the sensor's signal state in the process image. Another bit signals short-circuits or open leads. Red or green LEDs indicate the state of the two input bits.
