

C9900-M419 | Toolboard for keyboard or tools without integrated USB socket

Toolboard for keyboard or tools for CP3xxx multi-touch Control Panels and Panel PCs

The toolboard at a Beckhoff Panel PC or Control Panel allows a standard PC keyboard to be placed in front of the Control Panel.

The toolboard is made of coated aluminium and its design matches the Control Panel. The toolboard has a width of 468 mm.

This option can be retrofitted or removed at a Panel-PC CP3xxx-16xx.

For the use of a USB keyboard it is necessary to order an additional USB-port. For CP39xx the option C9900-E274 is recommended.

For a permanent use of an USB keyboard the toolboard option C9900-M406 with integrated USB-port or the option C9900-M423 with 2 integrated USB-ports are recommended.

It is cost-intensive to retrofit an USB-port.

Ordering information	Keyboard shelf for CP3xxx
C9900-M419	Toolboard for keyboard or tools, mounted under a Control Panel or Panel PC CP3xxx, without integrated USB socket IP 65 at the rear side, can be ordered only together with the Control Panel or Panel PC.
