

## TC1320 | TC3 C++/MATLAB®/Simulink®

Extension of the TC1300 by the possibility to execute modules generated by MATLAB®/Simulink®.

- contains the TwinCAT 3 C++ runtime
- allows the execution of modules generated in MATLAB®/Simulink®
- multiple instancing of modules
- parameterisation of these modules at runtime
- online access to all parameters (can be deactivated)
- generic modules (no hardware connection necessary within the models)
- connection to the external mode of Simulink®
- connection to the TwinCAT C++ debugger with graphical representation of the blocks
- modules can be called from other modules or directly by tasks

Technical data	TC1320
Target system	Windows 7/8/10 (Windows CE is not supported)

Ordering information	
TC1320-0v30	TC3 C++/Matlab®/Simulink®, platform 30 (Economy Plus)
TC1320-0v40	TC3 C++/Matlab®/Simulink®, platform 40 (Performance)
TC1320-0v50	TC3 C++/Matlab®/Simulink®, platform 50 (Performance Plus)
TC1320-0v60	TC3 C++/Matlab®/Simulink®, platform 60 (Mid Performance)
TC1320-0v70	TC3 C++/Matlab®/Simulink®, platform 70 (High Performance)
TC1320-0v80	TC3 C++/Matlab®/Simulink®, platform 80 (Very High Performance)
TC1320-0v81	TC3 C++/Matlab®/Simulink®, platform 81 (Many-core 5...8 Cores)
TC1320-0v82	TC3 C++/Matlab®/Simulink®, platform 82 (Many-core 9...16 Cores)
TC1320-0v83	TC3 C++/Matlab®/Simulink®, platform 83 (Many-core 17...32 Cores)
TC1320-0v84	TC3 C++/Matlab®/Simulink®, platform 84 (Many-core 33...64 Cores)
TC1320-0v90	TC3 C++/Matlab®/Simulink®, platform 90 (Other)
TC1320-0v91	TC3 C++/Matlab®/Simulink®, platform 91 (Other 5...8 Cores)
TC1320-0v92	TC3 C++/Matlab®/Simulink®, platform 92 (Other 9...16 Cores)
TC1320-0v93	TC3 C++/Matlab®/Simulink®, platform 93 (Other 17...32 Cores)
TC1320-0v94	TC3 C++/Matlab®/Simulink®, platform 94 (Other 33...64 Cores)
