

## TF5250 | TC3 CNC HSC Pack

TwinCAT CNC HSC Pack is an optional high-speed cutting solution for the TwinCAT CNC:

- cross-block velocity and acceleration control for optimum utilisation of the axis dynamics and thus higher path speeds
- high surface quality through smoothed dynamics and associated reduction of vibrational excitation of the machine
- effective control of specified contour tolerances
- path programming via splines with programmable spline type (Akima-spline, B-spline) for reduction of NC blocks for free-form surfaces
