

## **i** TF7250 | TC3 Vision Code Reading

TC3 Vision Code Reading includes functions for reading various 1D and 2D codes.

This provides the basis for being able to check code content directly in real time and to track products during the manufacturing process. It eliminates the need for additional interfaces and runtime delays in communication with external devices.

The reading results can be displayed as an image at any time for process monitoring purposes or saved for continuous quality assurance.
