(1) **Number of ASi networks, number of ASi Master**  
"Double Master": 2 ASi networks, 2 ASi Masters.

(2) **1 power supply, 1 gateway for 2 ASi networks, inexpensive power supplies**  
"no, max. 8 A/ASi network, redundant supply": 1 power supply per ASi network. Gateway is powered in normal operation from one of the two ASi power supplies. Should one ASi power supply fail, switching to the other ASi power supply allows all the diagnostics functions to be maintained and the unaffected ASi network continues to operate.

(3) **Diagnostic and configuration interface**  
"Ethernet fieldbus + Ethernet diagnostic": Access to ASi Master and Safety Monitor with Bihl+Wiedemann software by using the Ethernet diagnostic interface or Ethernet fieldbus interface

The latest version of the device description file of the gateway is available in the "Downloads" section of the respective device.
