

## Bundle of Bihl+Wiedemann Suite (BW2902) and 3.5 mm Jack Plug Cable (BW1417)

The Bihl+Wiedemann software ASi Control Tools360 simplifies the addressing, configuration and commissioning of standard hardware. ASi Control Tools360 are suitable for performing live diagnostics of configured and detected devices in the ASi circuit. The software can be used for configuration, programming as well as for ASi diagnostics of ASi masters and ASi gateways.

The diagnostic software quickly detects and describes faults in standard ASi networks and in ASi safety networks. The user-friendly diagnostic software is mainly used for commissioning and maintenance intervals and provides concrete error information and direct suggestions for solutions. The information and solutions are clearly presented in the software mask and provide even inexperienced ASi users with direct "help for self-help" in the event of errors occurring during the test.

**(1) Diagnostic Software:**

Software to perform a release measurement or independent troubleshooting and preventative diagnostics on a system.

**(2) ASIMON360**

Software to configure safe hardware, to create a safety configuration and to put it into operation.

**(3) ASIMON360 Simulation**

Software to test an existing ASIMON360 configuration on simulated hardware.

**(4) ASi Control Tools360**

Software for addressing, configuring and implementing of non-safety hardware and for simple live diagnostics of planned and detected devices in the ASi network. ASi Control Tools360 software as stand alone version.

<b>Article no.</b>	<b>BW4723</b>
<b>General data</b>	
Name	Bihl+Wiedemann Suite - Software for Configuration, Diagnostics and Commissioning
<b>Installation</b>	
Range of functions	ASi Control Tools360: For addressing, configuring and implementing of non-safety hardware and for simple live diagnostics of planned and detected devices in the ASi network. Diagnostics software: for release measurement on a system and for autonomous diagnostics and preventive troubleshooting
Installation options	full version - full-featured software of configurations standard installation (single-user-license) or virtual machine (floating license)

<b>Article no.</b>	<b>BW4723</b>
<b>Software requirements</b>	
Software requirements	Windows Vista / Windows 7 / Windows 8 / Windows 8.1 Win10 (from software package version 3.1.883.240)
	Windows .NET Framework 4.0
	PDF-Reader for viewing the logs
Hardware requirements	a Pentium®- or faster Intel®-processor (or compatible models, such as AMD® or Cyrix®)
	at least 500MB of free fixed disk storage
	at least 256MB main memory (RAM)
	a mouse (recommended) or touchscreen
	screen resolution: 1024 x 768 (minimum), 1280 x 768 (recommended)
Compatibility	32bit and 64bit systems
Supported interfaces	serial interface (RS232)
	USB
	Ethernet (UDP)
<b>Documentation</b>	
Documentation	software manuals
	example programs
Tutorials	to support the first local program you'll find Quick Start Guides and video tutorials in the download section of the article on our website

### Scope of delivery:

- Bihl+Wiedemann Suite - Software for Configuration, Diagnostics and Commissioning (art. no. BW2902)
- Serial Cable for ASi Scanner (art. no. BW1417)
