Features

- › 3-stage function
- › Stop command device
- › Vibration signal
- › LED indicator
- › Pushbutton
- › Straight connection cable, 5 m

3-stage function

Enabling function is active only in the second stage (middle position, actuating point). If the pushbutton is released or pushed further (panic function), the enabling is removed (dependent on the wiring, see function sequence).

Stop command device

Machine stop (black, with pull-to-reset button) on the switch housing, for different wiring concepts.
Upper position for rapid access in an emergency

Vibration signal

The vibration signal is used for tactile feedback of the enabling position.

LED indicator

The LED indicator is used for visual feedback directly at the enabling switch.

Pushbutton

Additional functions can be run directly at the enabling switch using the buttons.

Cable

The high-quality connection cables are available in a straight version.
