### Features

- › Protocol driver software for integrating the EKS Electronic-Key adapters with serial or USB interface into a PC application in Windows

### Product description

Integrating the EKS Electronic-Key adapters with serial or USB interface into a PC application in Microsoft Windows® is supported by an optionally available ActiveX module® (can be used if user programs support ActiveX®, e.g. Microsoft Visual Basic®). EKS can thus be used, for example, in conjunction with process visualization software. Data communication is based on the transfer protocol 3964R. The ActiveX® module is used here as a protocol driver. For this purpose the ActiveX® module must be installed and integrated into the related programming environment.

### System requirements

- › Standard PC
- › Operating system: Microsoft Windows® XP / Server 2003 / Server 2008 32-bit / Server 2008 64-bit / Windows® 7 32-bit / 64-bit / Server 2008 R2
- › Interfaces: serial or USB with EKS USB drives installed (depending on version)

of the Electronic-Key adapter)
