OPTICAL SENSORS • COLOR SENSORS

The functioning of the color sensors is based on the evaluation of the red, green and blue components of the light reflected by the objects to be measured, or from the emitted radiation of the 'self-luminous' object (for example, LEDs, automobile tail lights, halogen lamps, fluorescent lamps, etc.). For this purpose, a so-called 3-fold receiver is integrated in the unit next to an on / off switchable white light or UV-light. This receiver works according to the True Color principle. This means that the evaluation of the light hitting the receiver is similar to the color perception of the human eye. This is a prerequisite for the reliable differentiation of objects or luminous objects by their color and brightness. For testing fluorescent materials the use of sensors with UV-light source is recommended. The

use under adverse environmental conditions is possible through the use of additional fiber optics. The interaction between a precise detection and a high switching frequency distinguishes the devices. Thus, they are an ideal tool for process and quality control.

MECHANICAL DATA

Ambient temperature	-20 °C 55 °C
Degree of protection (IP)	IP64
Fiber optics core material	Glass
For damp environments	Yes
Housing coating	Anodised
Housing design	Cuboid
Housing material	Aluminium
Sensor height	28 mm
Sensor length	65 mm
Sensor width	65 mm
Storage temperature	85 °C
Storage temperature	-20 °C
With fiber optics connection	Yes

ELECTRICAL DATA

EMC test in acc. with	DIN EN 60947-5-2
Equipment protection class	Protection class 3
Max. number of measurements for averaging	32768
Max. output current	100 mA
Measurement frequency in alternating light operation	20000 Hz
Measurement frequency in constant light operation	35000 Hz
Measurement frequency in flash mode	5000 Hz
No-load current	220 mA
Number of digital inputs	1
Number of LEDs	5
Number of pins	8
Number of pins of the communication interface	4

ELECTRICAL DATA

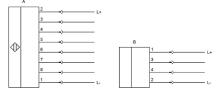

Operating voltage Overload protection Pulse stretching Rated control supply voltage Us at DC Reverse polarity protection Selectable amplifier stages Sensing range 1 mm 500 mm Setting procedure Setting procedure Standard for interfaces Switching frequency Temperature drift ΔX/ΔT; ΔY/ΔT typ. 0.2 digits/°C (< 0.01% / °C) Type of communication interface Type of plug-in contact, communication interface Type of switching function Type of switching output Voltage type With communication interface, RS-232 Wes	Number of switching outputs	5

Type of plug-in contact, communication interface Type of switching function Type of switching output PNP/NPN Voltage type DC With communication interface, RS-232 Yes	Type of communication interface	Connector M5
Type of switching function Push-pull Type of switching output PNP/NPN Voltage type DC With communication interface, RS-232 Yes	Type of electrical connection	Connector M9
Type of switching output Voltage type DC With communication interface, RS-232 Yes	Type of plug-in contact, communication interface	Female (socket)
Voltage type DC With communication interface, RS-232 Yes	Type of switching function	Push-pull
With communication interface, RS-232 Yes	Type of switching output	PNP/NPN
·	Voltage type	DC
Adrilla a translationals and the state of th	With communication interface, RS-232	Yes
With external teach Yes	With external teach	Yes
With external trigger Yes	With external trigger	Yes
With LED display Yes	With LED display	Yes
With time function Yes	With time function	Yes

OPTICAL DATA

Alternating light operation	Yes
Color distance	$\Delta E \ge 0.5$
Color spaces	X Y INT siM (Lab)
Constant light operation	Yes
Flash mode	Yes
For transmitted light applications	Yes
Light source	White light
Max. ambient light	5000 lx
Measuring method for color detection	Active tristimulus method
True color	Yes

CONNECTION

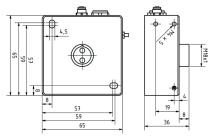

Colors: A: M9: 1 = WH (white), 2 = BN (brown), 3 = GN (green), 4 = YE (yellow), 5 = GY (gray), 6 = PK (pink), 7 = BU

(blue), 8 = RD (red)

Functions: A: M9: 1 = L-, 2 = L+, 3 = In 0, 4 = OUT 0, 5 = OUT 1, 6 = OUT 2, 7 = OUT 3, 8 = OUT 4

B: M5: 1 = L+, 2 = L-, 3 = RxD, 4 = TxD

DIMENSIONAL DRAWING

INSTALLATION

Mounting / Installation may only be carried out by a qualified electrician!

DISPOSAL

SAFETY WARNINGS

Before initial operation, please make sure to follow all safety instructions that may be provided in the product information!
