

## OG800376

## **OPTICAL SENSORS • FORK LIGHT BARRIERS**

Special design of through-beam sensor. Transmitter and receiver are located in the fork or angular limbs and are perfectly aligned to each other.

## **MECHANICAL DATA**

# **IPF** ELECTRONIC

## **ELECTRICAL DATA**

Scanning function	Light-/dark-on mode
-	
Setting procedure	Manual adjustment
Short-circuit-proof	Yes
Suitable for safety functions	No
Switching frequency	300 Hz
Type of electrical connection	Connector M8
Type of switching function	Normally closed contact/normally open con- tact
Type of switching output	PNP
Type of the forked light barrier	Increased soiling reserve
Voltage drop	2.8 V
Voltage type	DC
With communication interface, analog	No
With communication interface, AS-Interface	No
With communication interface, CANOpen	No
With communication interface, DeviceNet	No
With communication interface, Ethernet	No
With communication interface, INTERBUS	No
With communication interface, PROFIBUS	No
With communication interface, RS-232	No
With communication interface, RS-422	No
With communication interface, RS-485	No
With communication interface, SSD	No
With communication interface, SSI	No
With monitoring function of downstream devices	No
With other analog output	No
With restart lock	No
With time function	No

# **OPTICAL DATA**

Laser protection class	None
Light beam form	Point
Light source	Infrared light
Min. object size	3 mm
Resolution	3000 μm
Wavelength of the sensor	880 nm

# **OTHER DATA**

Feeding technology	
--------------------	--

Yes

## CONNECTION

**Colors:** A: 1 = BN (brown), 3 = BU (blue), 4 = BK (black) B: 1 = BN (brown), 3 = BU (blue), 4 = BK (black)**Functions:** A: 1 = L+, 3 = L-, 4 = PNP NO B: 1 = L+, 3 = L-, 4 = PNP NC

## **DIMENSIONAL DRAWING**

## INSTALLATION

Mounting / Installation may only be carried out by a qualified electrician!

#### **SAFETY WARNINGS**

Before initial operation, please make sure to follow all safety instructions that may be provided in the product information!
