

Model number

U-G1P

AS-Interface module mounting base for connection to round cable (AS-Interface)

Function

The U-G1P lower section makes it possible to connect slaves from the G1 and G4 series to the AS-Interface without an additional power supply (EMS). It features two connections to the AS-Interface which are linked together. In this way it can serve as a distributor from one AS-Interface arm to another. The cable ducts are designed for round cables, the device is connected via screw terminals.
