

### Model number

# VBA-2E2A-G2-ZA/EA2

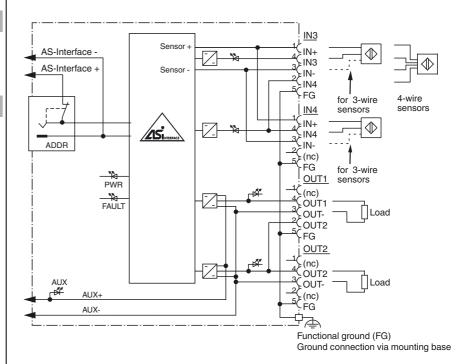

G2 flat module 2 inputs (PNP) and 2 electronic outputs

## Features

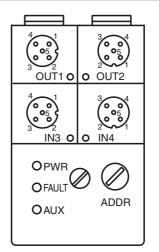

- AS-Interface certificate
- Degree of protection IP67 •
- A/B slave with extended addressing • possibility for up to 62 slaves
- Addressing jack ٠
- Flat cable connection with cable piercing technique, variable flat cable guide
- Communication monitoring •
- Inputs for 2-, 3-, and 4-wire sensors •
- Power supply of outputs from the external auxiliary voltage
- Supply for inputs from AS-Interface •
- Ground connection (FE) possible •
- Function display for bus, ext. auxiliary voltage, inputs and outputs
- Detection of overload on sensor supp-• ly
- Detection of output overload

# AS-Interface sensor/actuator module

The VBA-2E2A-G2-ZA/EA2 is an AS-Interface interface module with 2 Inputs and 2 outputs. Mechanical contacts (e.g. push buttons) as well as 2-, 3- and 4-wire sensors can be connected to the inputs. The outputs are electronic outputs, which can be loaded

The IP67 flat module is ideal for applications

in the field. An addressing jack is integrated in

Connection to the sensors/actuators is provided via M12 x 1 screw connections. An LED is provided for each channel, on the top of the

to 24 V DC and 1 A per output.

Technical data			
General specifications			
Slave type		A/B slave	
AS-Interface specification		V2.1	
Required master specification		≥ V2.1	
UL File Number		E223772	
Indicators/operating means			
LED FAULT		error display; LED red	
		red: communication error or address	
		red flashing: overload of sensor powe	r supply or outputs
LED PWR		AS-Interface voltage; LED green	
LED AUX		ext. auxiliary voltage U <sub>AUX</sub> ; LED gree	n
		switching state (input); 2 LED yellow	
LED OUT		Switching state (output); 2 LED yellow	I
Electrical specifications			
, ,	/ 10/1	20 30 V DC PELV	
	J <sub>e</sub>	26.5 31.6 V from AS-Interface	
	е	$\leq$ 40 mA (without sensors) / max. 140	mA

module, to indicate the current switching status. Similarly, an LED is provided to monitor the AS-Interface communication and to indicate that the module has the address 0. LEDs are also provided to indicate the AS-Interface ated power supplies voltage and the external power supply. The U-G3FF mounting base is normally used for the connection of the AS-Interface flat cable and the external 24 V DC power supply. The specially designed base enables the user to connect flat cable from both sides. The device is equipped with communication ort-circuit protected monitoring, which switches off power to the inputs if no communication has taken place for longer than 40 ms. An overloading of the internal power supply or of the outputs is signalled to the AS-interface master via the "Peripheral fault" function. -circuit proof Communication via the AS-Interface remains intact. Note:

Function

the module.

The mounting base for the module is sold separately.

# VBA-2E2A-G2-ZA/EA2

Housing	PBT
Mass	100 g
Tightening torque, cable gland	0.4 Nm
Mounting	Mounting plate

# Notes

In the case of 4-wire sensors, you must use slot IN3 for the inputs (internally bridged).

Do not connect inputs and outputs, which are supplied via the module from AS-interface or via auxiliary power, with power supply and signal circuits with external potentials.
