Model Number

U-P3-R4-V15

Base with addressable serial Interface RS 485

Features

- Protection degree IP67
- Simple bus system with up to 30 units
- Serial interface RS 485, addressable

Function

The base is used in combination with an upper part, the IPT*-FP read/write station. An addressable RS 485 interface is available. It is thus possible to create a simple bus connection with up to 30 subscribers.
The address is set and the terminating resistor for the bus is connected via DIP switches. The read/write station is connected to a higher-order control system via the serial interface and receives the commands for writing and/or reading code or data carriers via this interface.
