Model Number

UB500-18GM75-E23-V15

Single head system

Features

- **2 switch outputs**
- **Selectable sound lobe width**
- **Program input**
- **Temperature compensation**
- **Very small unusable area**

Diagrams

Characteristic response curve

Distance Y [mm] vs Distance X [mm]

flat surface 100 mm x 100 mm

round bar, Ø 25 mm

☐ wide sound lobe
☐ narrow sound lobe

Technical data

General specifications

Sensing range	30 ... 500 mm
Adjustment range	50 ... 500 mm
Dead band	0 ... 30 mm
Standard target plate	100 mm x 100 mm
Transducer frequency	approx. 380 kHz
Response delay	approx. 50 ms

Indicators/operating means

LED yellow	indication of the switching state flashing: program function object detected
LED red	"Error", object uncertain in program function: No object detected

Electrical specifications

Operating voltage U_B	10 ... 30 V DC , ripple 10 %$_{SS}$
No-load supply current I_0	≤ 50 mA

Input

Input type	1 program input, operating range 1: -U_B ... +1 V, operating range 2: +4 V ... +U_B input impedance: > 4.7 kΩ; program pulse: ≥ 1 s

Output

Output type	2 switch outputs PNP, NO/NC
Rated operating current I_e	2 x 100 mA , short-circuit/overload protected
Voltage drop U_d	≤ 3 V
Repeat accuracy	≤ 1 %
Switching frequency f	max. 8 Hz
Range hysteresis H	1 % of the set operating distance
Temperature influence	± 1.5 % of full-scale value

Ambient conditions

Ambient temperature	-25 ... 70 °C (-13 ... 158 °F)
Storage temperature	-40 ... 85 °C (-40 ... 185 °F)

Mechanical specifications

Connection type	Connector M12 x 1 , 5-pin
Degree of protection	IP67
Material	
Housing	brass, nickel-plated
Transducer	epoxy resin/hollow glass sphere mixture; foam polyurethane, cover PBT
Mass	60 g

Factory settings

|	
Output 1	Switching point: 50 mm output function: Switch point operation mode output behavior: NO contact
Output 2	Switching point: 500 mm output function: Switch point operation mode output behavior: NC contact
Beam width	wide

Compliance with standards and directives

Standard conformity	
Standards	EN 60947-5-2:2007 + A1:2012 IEC 60947-5-2:2007 + A1:2012

Approvals and certificates
UL approval	cULus Listed, General Purpose
CSA approval	cCSAus Listed, General Purpose
CCC approval	CCC approval / marking not required for products rated ≤36 V

Accessories

UB-PROG3
Programming unit

OMH-04
Mounting aid for round steel ø 12 mm or sheet 1.5 mm ... 3 mm

BF 18
Mounting flange, 18 mm

BF 18-F
Mounting flange with dead stop, 18 mm

BF 5-30
Universal mounting bracket for cylindrical sensors with a diameter of 5 ... 30 mm

UVW90-K18
Ultrasonic -deflector

V15-G-2M-PVC
Female cordset, M12, 5-pin, PVC cable

M18K-VE

Description of Sensor Functions

Programming procedure

The sensor features two switch outputs with one programmable switch point, each. Programming the switch points is done by applying the supply voltage $-U_B$ (switch output 1) or $+U_B$ (switch output 2) to the Teach-In input. The supply voltage must be applied to the Teach-In input for at least 1 s. LEDs indicate whether the sensor has recognized the target during the programming procedure.

Note:

Switching points may only be specified directly after Power on. A time lock secures the adjusted switching points against unintended modification 5 minutes after Power on. To modify the switching points later, the user may specify the desired values only after a new Power On.

Note:

If a programming adapter UB-PROG3 is used for the programming procedure, button A1 is assigned to $-U_B$ and button A2 is assigned to $+U_B$.

Programming switch ouputs

Switch point for switch output 1
  1. Place the target at the desired switch point position of switch output 1
  2. Program the switch point by applying $-U_B$ to the Teach-In input (corresponding yellow LED flashes)
  3. Disconnect the Teach-In input from $-U_B$ to save the switch point

Switch point for switch output 2
  1. Place the target at the desired switch point position of switch output 2
  2. Program the switch point by applying $+U_B$ to the Teach-In input (corresponding yellow LED flashes)
  3. Disconnect the Teach-In input from $+U_B$ to save the switch point

Programming detection of object presence
  1. Cover the sensor face with hand or remove all objects from sensing range
  2. Apply $-U_B$ to the Teach-In input (red LED flashes)
  3. Disconnect the Teach-In input from $-U_B$
  4. Apply $+U_B$ to the Teach-In input (red LED flashes)
 5. Disconnect the Teach-In input from $+U_B$

Note: Only one switch output can be configured for detection of presence of objects. If the sensor detects an object within the maximum detection range, the switch output switches.

Adjusting the sound cone characteristics:

The ultrasonic sensor enables two different shapes of the sound cone, a wide angle sound cone and a small angle sound cone.

1. Small angle sound cone
  • switch off the power supply
  • connect the Teach-In input wire to $-U_B$
  • switch on the power supply
  • the red LED flashes once with a pause before the next.
  • yellow LED: permanently on: indicates the presence of an object or disturbing object within the sensing range
  • disconnect the Teach-In input wire from $-U_B$ and the changing is saved

2. Wide angle sound cone
  • switch off the power supply
  • connect the Teach-In input wire with $+U_B$
  • switch on the power supply
  • the red LED double-flashes with a long pause before the next.
  • yellow LED: permanently on: indicates an object or disturbing object within the sensing range
  • disconnect the Teach-In input wire from $+U_B$ and the changing is saved
Factory settings

See technical data.

Display

The sensor provides LEDs to indicate various conditions.

SENSING YOUR NEEDS | **3**

	Red LED	Yellow LED 1	Yellow LED 2
During Normal operation			
Proper operation	Off	Switching state output 1	Switching state output 2
Interference (e.g. compressed air)	On	remains in previous state	remains in previous state
Programming of output 1			
Object detected	Off	Flashes	Off
No object detected	Flashes	Off	Off
Object uncertain (programming invalid)	On	Off	Off
Programming of output 2			
Object detected	Off	Off	Flashes
No object detected	Flashes	Off	Off
Object uncertain (programming invalid)	On	Off	Off

Installation conditions

If the sensor is installed at places, where the environment temperature can fall below 0 °C, for the sensors fixation, one of the mounting flanges BF18, BF18-F or BF 5-30 must be used.

In case of direct mounting of the sensor in a through hole using the steel nuts, it has to be fixed at the middle of the housing thread. If a fixation at the front end of the threaded housing is required, plastic nuts with centering ring (accessories) must be used.
