Mechanical specifications

Connection	
Field side	wiring comb , blue
Control side	wiring comb , grey
Material	
	profile rail: aluminum wiring comb: plastic
Mass	
	approx. 6.5 kg
Dimensions	
	130 x 113.2 x 1800 mm (5 x 4.46 x 71 inch)
Accessories	
Designation	provided accessories: mounting aids (glide nuts and glide nut retainers)

Function

The profile rail can be used to provide space-saving mounting for interface modules and accommodate the associated wiring. The system and field cables for safe and hazardous signals are easily installed in the integral cable ducts of the profile rail. Thus no additional cable guides are necessary.

The asymmetrical segmented connection compartment can be changed dependent on the required space by turning the profile rail. Please note that the wiring combs of different colors must be changed too.

In conjunction with K-System modules the profile rail can be mounted in Zone 2.
