Dimensions

Model Number

UB-PROG4-V31

Programming unit for ultrasonic sensors with Teach-in input at pin 2

Technical data

| Mechanical specifications | |
|---------------------------|----------------|
| Connection type | M8 x 1 , 4-pin |
| Material | |
| Housing | PVC |
| Cable | PVC |
| Mass | 40 g |

Note

For the teach-in process, the programming unit is connected between the cable connection box and the plug connection on the sensor. The button starts the Teach-in process. Pressing the button connects plug pins 2 and 3 to each other.

For a detailed description of the Teach-in process, refer to the sensor data sheet. The taught values are stored in the non-volatile memory. They are retained in the sensor after removing the programming unit and/or turning off the operating voltage.
