## **Features**

- 4-channel
- · Outputs Ex ia
- Module can be exchanged under voltage (hot swap)
- Installation in suitable enclosures in Zone 1
- Analog output module for 0/4 mA ... 20 mA
- HART communication via field bus or service bus
- Simulation mode for service operations (forcing)
- · Line fault detection (LFD): one LED per channel
- · Permanently self-monitoring

## **Function**

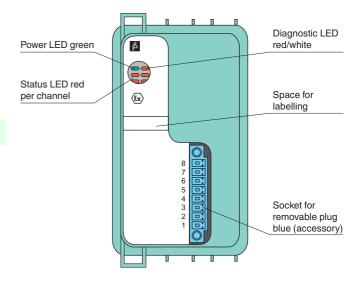

The device drives positioners, proportional valves, I/P converters, or local indicators.

Open and short-circuit line faults are detected.

The outputs are galvanically isolated from the bus and the power supply.

General information		
System information		The module has to be mounted in appropriate backplanes and housings (FB92**) in Zone 1, 2, 21, 22 or outside hazardous areas (gas or dust). Here, observe the corresponding EC-type examination certificate.
Supplementary information		EC-Type Examination Certificate, Statement of Conformity, Declaration of Conformity, Attestation of Conformity and instructions have to be observed where applicable. For information see www.pepperfuchs.com.
