$C\epsilon$

Model Number

PCV100B-F200-R4-V15-LS221

Read head for incident light positioning system

Features

- **RS 485 interface**

- **Mechanically rugged: no wearing parts, long operating life, maintenance-free**

- **High resolution and precise positioning, especially for facilities with curves and switch points as well as inclines and declines.**

- **Non-contact positioning on Barcode strip**

- **Travel ranges up to 524 m**

Diagrams

Coordinates
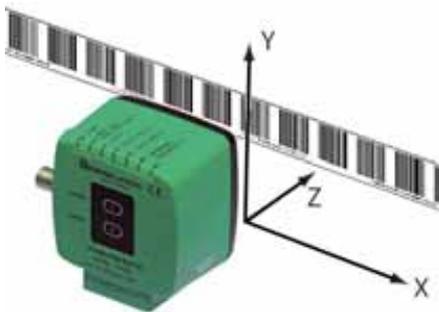

Technical data

| General specifications	
Passage speed v	≤ 6 m/s
Measuring range	max. 524 m
Light type	Integrated LED lightning (red)
Read distance	100 mm
Depth of focus	± 20 mm
Reading field	80 mm x 50 mm
Ambient light limit	100000 Lux
Resolution	± 1 mm
Nominal ratings	
Camera	
Type	CMOS , Global shutter
Processor	
Clock pulse frequency	600 MHz
Speed of computation	4800 MIPS
Functional safety related parameters	
$MTTF_d$	20 a
Mission Time (T_M)	10 a
Diagnostic Coverage (DC)	0 %
Indicators/operating means	
LED indicator	7 LEDs (communication, alignment aid, status information)
Electrical specifications	
Operating voltage U_B	15 ... 30 V DC , PELV
No-load supply current I_0	max. 200 mA
Power consumption P_0	3 W
Interface	
Interface type	RS 485 interface
Data output code	binary code
Protocol	WCS...B-LS221
Transfer rate	62500 Bit/s
Termination	Switchable terminal resistor
Query cycle time	≥ 10 ms
Input	
Input type	1 funtion input 0-level: $-U_B$ or unwired 1-level: +8 V ... $+U_B$, programmable
Input impedance	≥ 27 kΩ
Output	
Output type	1 switch output PNP , programmable , short-circuit protected
Switching voltage	Operating voltage
Switching current	150 mA each output
Standard conformity	
Emitted interference	EN 61000-6-4:2007+A1:2011
Noise immunity	EN 61000-6-2:2005
Shock resistance	EN 60068-2-27:2009
Vibration resistance	EN 60068-2-6:2008
Ambient conditions	
Operating temperature	0 ... 60 °C (32 ... 140 °F) , -20 ... 60 °C (-4 ... 140 °F) (noncondensing; prevent icing on the lens!)
Storage temperature	-20 ... 85 °C (-4 ... 185 °F)
Relative humidity	90 % , noncondensing
Mechanical specifications	
Connection type	5-pin, M12 x 1 connector
Housing width	70 mm
Housing height	70 mm
Degree of protection	IP67
Material	
Housing	PC/ABS
Mass	approx. 160 g

| Approvals and certificates	
UL approval	cULus Listed, General Purpose, Class 2 Power Source, Type 1 enclosure
CCC approval	CCC approval / marking not required for products rated ≤36 V

Pinout

General

The PCV… reading head is part of the positioning system in the method for measurement by Pepperl+Fuchs. It consists of a camera module and an integrated illumination unit among other things. The reading head detects position marks, which are put on an adhesive code band in the form of Barcode. The mounting of the code band is as a rule stationary on a firm part of the plant (elevator shaft, overhead conveyor mounting rails…); that of the reading head is parallel on the moving "vehicle" (elevator car, overhead conveyor chassis…).

Additional Information

LED	1	2	3	4	5	6	7
	COM	PWR / ADJ	ERR / NO CODE	OUT1	ADJY	ADJZ	INTERNAL DIAGNOSTIC

Accessories

V15-G-ABG-PG9
Female connector, M12, 5-pin, shielded, field attachable

V15-G-ABG-PG9-FE
Female connector, M12, 5-pin, shielded, field attachable

PCV-SC12
Grounding clip for PCV system

PCV-LM25
Marker head for 25 mm code tape

PCV-MB1
Mounting bracket for PCV* read head

PCV-AG100
Alignment guide for PCV100-* read head

Vision Configurator
Operating software for camera-based sensors

PCV-USB-RS485-Converter Set
USB to RS 485 interface converter

PCV-KBL-V19-STR-RS485
Cable unit with power supply for USB / RS-485 interface converter

Mounting and commissioning

Mount the reading head such that its optical surface captures the optimal read distance to the code band (see Technical Data). The stability of the mounting and the guidance of the vehicle must be provided such that the depth of field of the reading head is not closed during operation. All reading heads can be optimally customized by parameterization for specific requirements.

Displays and Controls

The PCV... reading head allows visual function check and fast diagnosis with 7 indicator LEDs. The reading head has 2 buttons on the reverse of the device to activate the alignment aid and parameterization mode.

LEDs

LED	Color	Label	Meaning
1	Yellow	COM	Communication active
2	Green/red	PWR/ADJ ERR/NO CODE	Code recognized/not recognized, Error
3	Yellow	OUT1	Output 1
4	Yellow	ADJ Y	no function
5	Yellow	ADJ Z	no function
6,7	red/green/yellow	INTERNAL DIAGNOSTICS	Internal diagnostics

External parameterization

For external parameterization you require the parameterization code as Data Matrix with the desired reading head parameters. Data Matrix code cards for step-by-step external parameterization are printed in the reading heads operating instructions.

Parameterization is only possible within 10 minutes of switching on the reading head. If a button is pressed after 10 minutes subsequent to switching on, there is visual signaling via the LEDs (LED1, yellow/LED2, red/LED3, yellow/LED4, yellow/LED5, yellow flash for 2 seconds)

- The switchover from normal operation to parameterization mode is via button 2 on the reverse of the reading head. Button 2 must be pressed for more than 2 seconds. LED3 now flashes.
  Note: Parameterization mode automatically ends after 1 minute of inactivity. The reading head returns to normal operation and works with unchanged settings.
- Place the parameterization code in the view of the camera module. After recognition of the parameterization code, the green LED2 lights up for 1s. In the event of an invalid parameterization code, the red LED2 lights up for 2 s.
- A short press on button 2 ends the parameterization mode and the changed parameters are not stored volatile in the reading head.
