## Features

- Protection module for 1 signal line
- Nominal voltage 24 V DC
- · Protection module for non-grounded signal lines
- Max. surge current (8/20 μs) 10 kA
- Uninterruptable operation (auto reset)
- · Status indication output
- · Mounting on base module, pluggable
- Up to SIL 3 acc. to IEC 61508

## **Function**

The protection module limits induced transients of different causes, e.g. lightning or switching operations. The limitation is achieved by diverting the current to earth and limiting the signal circuit voltage during the duration of the overvoltage pulse.

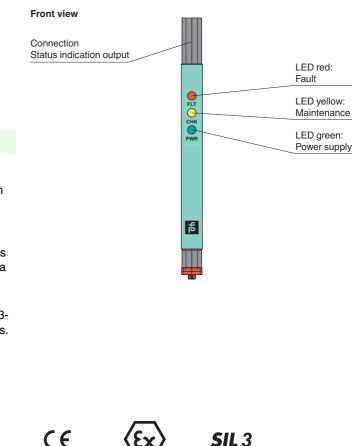

The device has LEDs for the status indication. If required, this status is transferred to the corresponding function module via a status indication output.

The device is used in applications where more than 2 signal lines have to be protected, e.g. in applications with 3wire resistance thermometers or 4-/6-wire measuring bridges.

The device is HART transparent.

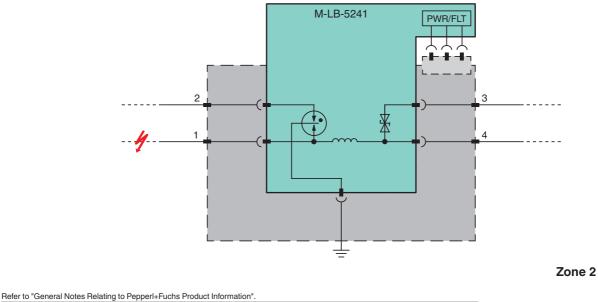

The device is inserted onto the base module and forms the surge protection barrier together with the base module.

The device can be replaced without tools by a locking lever.

General specifications	
Number of protected signal lines	1
Topology	non-grounded
Functional safety related parameters	
Safety Integrity Level (SIL)	SIL 3
Supply	
Connection	via Universal Power Rail M-UPR-03-S
Nominal voltage	see power feed module M-LB-5300
Current	≤ 8 mA
Electrical specifications	
Connection	protected area: terminal 4
	unprotected area: terminals 1, 2, 3
Rated current Ir	500 mA, restrictions see derating characteristics
Leakage current	< 3 $\mu$ A at 24 V and 25 °C (77 °F) , line-line
Nominal voltage	24 V DC
Maximum continuous operating voltage	30 V DC
U <sub>c</sub>	
Series resistance	$\leq$ 0.5 $\Omega$ per line at 25 °C (77 °F)
Impulse rating	1 kV/0.5 kA (category C1)
