

Features

- 1-channel signal conditioner
- 24 V DC supply (loop powered)
- Logic input 19 V DC ... 27.6 V DC
- Relay contact output for energized to safe function
- Test pulse immunity
- Up to SIL 3 acc. to IEC 61508

Function

This signal conditioner provides the galvanic isolation between field circuits and control circuits.

The device is a relay module that is suitable for safely switching applications of a load circuit. The device isolates load circuits up to 30 V and the 24 V control circuit.

The energized to safe (ETS) function is permitted for SIL 3 applications.

For testing of the relays, test terminals can be used. The test mode will be indicated by a LED according to NAMUR NE44.
