Features

- 1 digital output, 2 digital inputs
- · Inputs and output Ex ia
- Installation in suitable enclosures in Zone 1
- Module can be exchanged under voltage (hot swap)
- · Positive or negative logic selectable
- Simulation mode for service operations (forcing)
- · Line fault detection (LFD)
- · Permanently self-monitoring
- · Output with watchdog

Function

The digital output features 1 output with 2 feedback inputs.

The device can be used to switch solenoids, sounders, or indicators (without line fault detection) in the field. Furthermore, the device accepts digital input signals of NAMUR sensors or mechanical contacts from the field.

Open and short-circuit line faults are detected.

The intrinsically safe inputs and the output are galvanically isolated from the bus and the power supply.

General information		
System information		The module has to be mounted in appropriate backplanes and housings (FB92**) in Zone 1, 2, 21, 22 or outside hazardous areas (gas or dust). Here, observe the corresponding EC-type examination certificate.
Supplementary information		EC-Type Examination Certificate, Statement of Conformity, Declaration of Conformity, Attestation of Conformity and instructions have to be observed where applicable. For information see www.pepperl-
