## Selection diagram

## Code structure

## FR 693-E3D1XGM2K70T6

| Housing |  |
| :--- | :--- |
| FR | technopolymer, one conduit entry |
| FX | technopolymer, two conduit entries |
| FW | technopolymer, three conduit entries |
|  |  |
| Contact blocks |  |
| $\mathbf{5}$ | 1NO+1NC, snap action |
| $\mathbf{6}$ | 1NO+1NC, slow action |
| $\mathbf{7}$ | 1NO+1NC, slow action, make before break |
| $\mathbf{9}$ | 2NC, slow action |
| $\mathbf{1 1}$ | 2NC, snap action |
| $\mathbf{1 3}$ | 2NC, slow action, shifted and spaced |
| $\mathbf{1 4}$ | 2NC, slow action, shifted |
| $\mathbf{1 8}$ | 1NO+1NC, slow action, close |
| $\mathbf{2 0}$ | 1NO+2NC, slow action |
| $\mathbf{2 1}$ | 3NC, slow action |
| $\mathbf{2 2}$ | 2NO+1NC, slow action |
| $\mathbf{3 3}$ | 1NO+1NC, slow action |
| $\mathbf{3 4}$ | 2NC, slow action |
| $\mathbf{3 7}$ | 1NO+1NC, slow action, make before break |
| $\mathbf{6 6}$ | 1NC, slow action |

## Head type

92 detachable head (FW housing only)
93 non-detachable head (FR, FX and FK housing only)

## Actuator extraction force

10 N (standard)

E3 30 N
30 N

| Ambient temperature |  |
| :--- | :--- |
|  | $-25^{\circ} \mathrm{C} \ldots+80^{\circ} \mathrm{C}$ (standard) |
| T6 | $-40^{\circ} \mathrm{C} \ldots+80^{\circ} \mathrm{C}$ |

## Pre-installed cable glands or connectors

no cable gland or connector (standard)
K23 cable gland for cables $\varnothing 6 \ldots 12 \mathrm{~mm}$

K70 M12 plastic connector, 4-pole

For the complete list of possible combinations please contact our technical department.

Threaded conduit entry
M2 M20x1.5 (standard)
M1 M16x1.5
PG 13.5 (FR-FX housing only)
A PG 11 (FR-FX housing only)

## Contact type

silver contacts (standard)
G silver contacts with $1 \mu \mathrm{~m}$ gold coating silver contacts, $2.5 \mu \mathrm{~m}$ gold coating (not for contact blocks 20, 21, 22, 33, 34)

External metallic parts

|  | zinc-plated steel (standard) |
| :--- | :--- |
| $\mathbf{X}$ | stainless steel |

stainless steel

## Actuators

without actuator (standard)
D straight actuator VF KEYD
D1 angled actuator VF KEYD1
D2 jointed actuator VF KEYD2

## Contact blocks

$331 \mathrm{NO}+1 \mathrm{NC}$, slow action
34 2NC, slow action
Actuator extraction force
10 N (standard)
E3 30 N
Actuators
without actuator (standard)
D straight actuator VF KEYD
D1 angled actuator VF KEYD1
D2 jointed actuator VF KEYD2

External metallic parts
zinc-plated steel (standard)
X stainless steel

## Ambient temperature

$-25^{\circ} \mathrm{C} \ldots+80^{\circ} \mathrm{C}$ (standard) T6 $-40^{\circ} \mathrm{C} \ldots+80^{\circ} \mathrm{C}$

## Pre-installed cable glands

no cable gland (standard)
K24 cable gland for cables $\varnothing 10 \ldots 5 \mathrm{~mm}$
K28 cable gland for cables $\varnothing 3 \ldots 7^{\circ} \mathrm{mm}$

## Threaded conduit entry

M1 M16x1.5(standard)
PG 11

## Contact type

silver contacts (standard)
G silver contacts with $1 \mu \mathrm{~m}$ gold coating

## Main features

- Technopolymer housing, from one to three conduit entries
- Protection degree IP67
- 15 contact blocks available
- 10 stainless steel actuators available
- Versions with M12 connector
- Versions with gold-plated silver contacts

## Quality marks:

## 

| IMQ approval: |  |
| :--- | :--- |
| UG610 |  |
| CCC approval: | E131787 |
| EAC approval: | 2007010305230013 |

## Technical data

## Housing

Housing made of glass fibre reinforced technopolymer, self-extinguishing, shock-proof and with double insulation:
FR series, one conduit entry: M20×1.5 (standard)
FK series: one threaded conduit entry: M16x1.5 (standard)
FX series: two knock-out threaded conduit entries: M20x1.5 (standard)
FW series: three knock-out threaded conduit entries: M20x1.5 (standard)
Protection degree:
IP67 acc. to EN 60529 with
cable gland of equal
or higher protection degree

## General data

SIL (SIL CL) up to:
Performance Level (PL) up to:

type 2 acc. to EN ISO 14119
low acc. to EN ISO 14119
2,000,000 for NC contacts
20 years
$-25^{\circ} \mathrm{C} \ldots+80^{\circ} \mathrm{C}$ (standard)
$-40^{\circ} \mathrm{C} \ldots+80^{\circ} \mathrm{C}$ (T6 option)
3600 operating cycles/hour
1 million operating cycles
$0.5 \mathrm{~m} / \mathrm{s}$
$1 \mathrm{~mm} / \mathrm{s}$
10 N (-E3 versions: 30 N )
see page 341
see page 357

## In compliance with standards:

IEC 60947-5-1, IEC 60947-1, IEC 60204-1, EN ISO 14119, EN ISO 12100, IEC 60529, EN 50581, BG-GS-ET-15, UL 508, CSA 22.2 No. 14

## Approvals:

EN 60947-5-1, UL 508, CSA 22.2 No.14, GB/T14048.5-2017.

## Compliance with the requirements of:

Machinery Directive 2006/42/EC, EMC Directive 2014/30/EU,
RoHS Directive 2011/65/EU.
Positive contact opening in conformity with standards:
IEC 60947-5-1, EN 60947-5-1.

## © If not expressly indicated in this chapter, for correct installation and utilization of all articles see the instructions given on pages 337 to 350.

## Description

These safety switches are ideal for controlling gates, sliding doors and other guards which protect dangerous parts of machines without inertia. The stainless steel actuator is fastened to the moving part of the guard in such a way that it is separated from the switch each time the guard is opened. A special mechanism ensures that removing the actuator forces the positive opening of the electrical contacts. Easy to install, these switches can be used with all types of guards (with hinge as well as sliding and removable types). The possibility to actuate the switch only with a specific actuator guarantees that the machine can be restarted only after the guard has been closed.

## Head with variable orientation

## Not detachable head

To make head adjustment safer and smoother, these switches are equipped with a special head to body coupling system. This system makes it impossible to remove the head from the device even during adjustment, thus rendering the use of one-way screws unnecessary for locking the head in position once adjustment is complete. This solution is available for the FR, FX and FK series.

## Protection degree IP67

These devices are designed to be used in the toughest environmental conditions and they pass the IP67 immersion test acc. to EN 60529. They can therefore be used in all environments where maximum protection degree of the housing is required.

## Extended temperature range

These devices are also available in a special
version suitable for an ambient operating tem-
perature range from $-40^{\circ} \mathrm{C}$ up to $+80^{\circ} \mathrm{C}$.
They can therefore be used for applications in cold stores, sterilisers and other equipment with low temperature environments. The special materials used to produce these versions retain their characteristics even under these conditions, thereby expanding the installation possibilities.

## Features approved by IMO

Rated insulation voltage ( $U_{i}$ ):

Conventional free air thermal current $\left(I_{t, t}\right)$ : Protection against short circuits:
Rated impulse withstand voltage ( $U_{\text {imp }}$ ):
Protection degree of the housing:
MV terminals (screw terminals)
Pollution degree:
Utilization category
Operating voltage (U) :
Operating current (I) :
Operating current (1):
Forms of the conta :
ent: $Z b, Y+Y, Y+Y+X, Y+Y+Y, Y+X+X$
33, 34, 66
In compliance with standards: EN 60947-1, EN 60947-5-1, fundamental
requirements of the Low Voltage Directive 2014/35/EU.
Please contact our technical department for the list of approved products.

## Wide-ranging actuator travel

The actuation head of this switch features a wide range of travel. In this way the guard can oscillate along the direction of insertion ( 4 mm ) without causing unwanted machine shutdowns. This wide range of travel is available in all actuators in order to ensure maximum device reliability.

Versions with $30 \mathbf{N}$ actuator extraction force

Versions with 30 N actuator holding force instead of the standard 10 N are available

## Safety screws for actuators

As required by EN ISO 14119, the actuator must be fixed immovably to the guard frame. Pan head safety screws with one-way fitting are available for this purpose. With this screw type, the actuators cannot be removed or tampered by using common tools. See accessories on page 332.

## Features approved by UL

Electrical Ratings:
Q300 pilot duty ( $69 \mathrm{VA}, 125-250 \mathrm{~V}$ dc) A600 pilot duty ( $720 \mathrm{VA}, 120-600 \mathrm{~V}$ ac)
Environmental Ratings:
Types 1, 4X, 12, 13
Use 60 or $75^{\circ} \mathrm{C}$ copper (Cu) conductor and wire size range 12, 14 AWG, stranded or solid. The terminal tightening torque of 7.1 lb in ( 0.8 Nm ).
The hub is to be connected to the conduit before the hub is connected to the enclosure.

Please contact our technical department for the list of approved products.

All switches listed above are available in a version with 30 N actuator extraction force.
To obtain these products, the order code must be changed by adding the extension "E3", for example FR 693-M2E3.

## Limits of use

- Do not use where dust and dirt may penetrate in any way into the head and deposit there. In particular where metal dust, concrete or chemicals are spread.
- Adhere to the EN ISO 14119 requirements regarding low level of coding for interlocks.
- Do not use in environments with presence of explosive or flammable gases or dusts. In these cases use ATEX products (see dedicated Pizzato catalogue).

## Stainless steel actuators

IMPORTANT: These actuators can only be used with items of the FR, FX, FK and FW series (e.g. FR 693-M2).
Low level of coding acc. to EN ISO 14119

The actuator can flex in four directions for applications where the guard alignment is not precise.

Actuator adjustable in one direction for guards with reduced dimensions.

Accessories See page 321
