notice

Inductive loads (e.g. contactors, relays, etc.) are to be suppressed by means of a suitable circuit.

notice - Wiring example

The sensor-free standstill monitor checks the e.m.f. of the three phase motor.

To secure a guard door

The SRB range guard door monitor checks the position of the guard door.

Monitoring the guard door using a solenoid interlock and a safety switch with separate actuator (A and B).

Release takes place by means of the NO contact (E) only when the run-down movement has been terminated.

After release has taken place, the guard door must be opened.

The wiring diagram is shown with guard doors closed and in de-energised condition.
