Flow Sensor 2 × Analog Output

FXFF122

Part Number

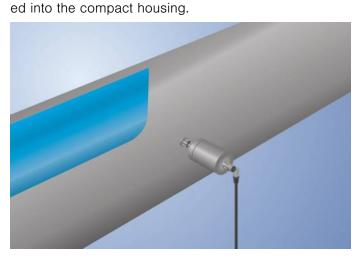

- 2 analog outputs: 4 ... 20 mA
- A single sensor for flow and temperature •
- **FDA** compliant
- Measurement independent of flow direction and instillation position

weFlux² Flow Sensors with two analog outputs simulta-

neously measure flow velocity and the temperature of aqueous liquids regardless of position and direction of flow. Advantage: The number of measuring points and the diversity of sensor variants are cut in half, and greatest possible flexibility is assured for installation in closed piping systems. The analysis module is integrat**Technical Data**

* Tested by wenglor ** The sensors were calibrated and specified for the medium water. Technically, the sensors are suitable for a medium temperature of up to -25 °C. To achieve a temperature below 0 °C, a different medium must be added to the water. This leads to a different measurement result, which is why a use under 0 °C must be tested individually for the mixture used.
