# 2D/3D Profile Sensor

MLWL273 Part Number

LASER

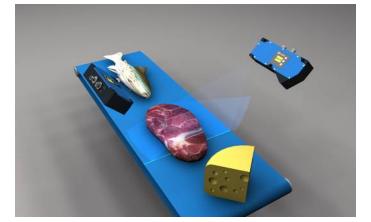

- Increased resistance to extraneous light and high speed
- Optimized profile quality thanks to HDR function
- Precise measuring range resolution X (> 2000 measuring points)
- Up to 12 million measuring points per second

2D/3D Profile Sensors project a laser line onto the object to be detected and generate an accurate, linearized height profile with an internal camera which is set up at a triangulation angle. Thanks to its uniform, open interface, the weCat3D series can be incorporated by means of the DLL program library or the GigE Vision standard without an additional control unit. Alternatively, wenglor offers its own software packages for implementing your application.

### **Technical Data**

| Optical Data                       |                        |
|------------------------------------|------------------------|
| Working range Z                    | 3001000 mm             |
| Measuring range Z                  | 700 mm                 |
| Measuring range X                  | 280830 mm              |
| Linearity Deviation                | 175 <i>µ</i> m         |
| Resolution Z                       | 27162 μm               |
| Resolution X                       | 181446 μm              |
| Light Source                       | Laser (blue)           |
| Wavelength                         | 450 nm                 |
| Service Life (T = +25 °C)          | 20000 h                |
| Laser Class (EN 60825-1)           | 3B                     |
| Max. Ambient Light                 | 5000 Lux               |
| Electrical Data                    |                        |
| Supply Voltage                     | 1830 V DC              |
| Current Consumption (Ub = 24 V)    | 1000 mA                |
| Measuring Rate                     | 1756000 /s             |
| Temperature Range                  | 045 °C                 |
| Storage temperature                | -2070 °C               |
| Inputs/Outputs                     | 4                      |
| Switching Output Voltage Drop      | < 1,5 V                |
| Switching Output/Switching Current | 100 mA                 |
| Short Circuit Protection           | yes                    |
| Reverse Polarity Protection        | yes                    |
| Overload Protection                | yes                    |
| Interface                          | Ethernet TCP/IP        |
| Baud Rate                          | 100/1000 Mbit/s        |
| Protection Class                   | III                    |
| FDA Accession Number               | 1710277-000            |
| Mechanical Data                    |                        |
| Housing Material                   | Aluminum               |
| Degree of Protection               | IP67                   |
| Connection                         | M12 × 1; 12-pin        |
| Type of Connection Ethernet        | M12 × 1; 8-pin, X-cod. |
| Optic Cover                        | Glass                  |
| Weight                             | 1120 g                 |
| Web server                         | yes                    |
| Configurable as PNP/NPN/Push-Pull  |                        |
| Switchable to NC/NO                | Ū Ū                    |
| Connection Diagram No.             | 1022 1023              |
| Control Panel No.                  | X2 A22                 |
| Suitable Connection Equipment No.  | 50 87                  |
| Suitable Mounting Technology No.   | 343                    |

Display brightness may decrease with age. This does not result in any impairment of the sensor function.
