

Protective Screen for ZLSS003

ZLSE003

Part Number

Technical Data

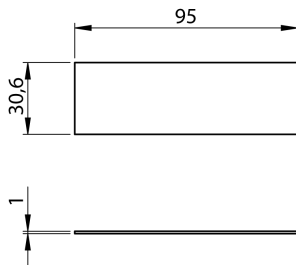

Mechanical Data

Material	Plastic
Coated Optics	yes
Packaging unit	2 Pieces

- **Antireflection coated in broad ranges with wavelengths from 400 to 700 nm**
- **Hardened surface**
- **Suitable for sensors with red or blue light**

The use of protective discs results in an offset in the Z direction of the sensor's measuring range. The amount of offset depends on the sensor model. Furthermore, linearity error is influenced by up to 0.1%.

All dimensions in mm (1 mm = 0.03937 Inch)
